

1. Write a C program to swap two numbers. The numbers are taken as input from the user.
2. Write a C program to compute quotient and remainder of an integer division. Dividend and divisor are taken from user.
3. Write a C program to add three numbers and print the result. Here the three numbers have to be taken from the user.
4. Write a program to compute grade of N students in a subject. N is the user input. The grades are assigned as follows:

Marks	Grade
marks<50	F
50≤marks<60	C
60≤marks<70	B
70≤marks<80	B+
80≤marks<90	A
90≤marks<100	A+

5. Write a program to check whether a date is valid or not.
